

SYSTEXX ACTIVE RENO

WALL RENOVATION WHILE BUSINESS CONTINUES

SYSTEXX ACTIVE Reno is a glass fabric with a special weave pattern, which optically equalizes uneven substrates. Its intentionally irregular, textured finish is particularly suitable for direct application over old wall coverings on areas in need of renovation, e.g. textured plaster up to 2 mm, or even tiles.

SYSTEXX Active Reno S38 and SP38 have been specifically developed for the quick renovation of many indoor areas. SYSTEXX Active Reno uses Aqua Technology. This makes it possible to renovate while everyday business continues, causing very little disruption, even in high-traffic areas such as hospital corridors.

SYSTEXX Active Reno SP38 is also pre-pigmented. Consequently, light colors need only **one coat of paint – and that's it!**

QUICK AND EASY

APPLICATION IN NEXT TO NO TIME

SYSTEXX Active S38 and SP38 use the clean Aqua Technology. This makes renovation possible while business goes on. Very little disruption, even in high-traffic areas such as hospital corridors.

Quick and easy application thanks to Aqua Technology. The adhesive is already applied evenly to the back of the fabric and is activated by water with the Aqua Quick device.

It takes approx. 1 minute for the adhesive to activate, or 2 to 3 minutes when applying to ceilings.

FAST. GOOD. SIMPLE.

WALLPAPERING COMPARISON

SYSTEXX BY VITRULAN

- | Pre-pasted wall covering
- | Easy to use (even for beginners)
- | No need for dust cloths

WALLPAPERING DEVICE

- | Adjustment of adhesive application depending on the type of fabric
- | Setting up and cleaning the device takes a long time; storage space required
- | Transport of adhesive

AIRLESS

- | High purchase costs
- | Setting up and cleaning the device takes a long time
- | Spraying problems at transitions, reveals rework required

ADHESIVE APPLIED WITH ROLLER

- | Extremely time consuming
- | Strenuous physical work
- | Uneven pasting, transport and storage of adhesive

EXCELLENT!

SYSTEXX
CERTIFIED QUALITY

Non-toxic

FLAMMABILITY RATING B - s1, d0
ACCORDING TO DIN EN 13501-1

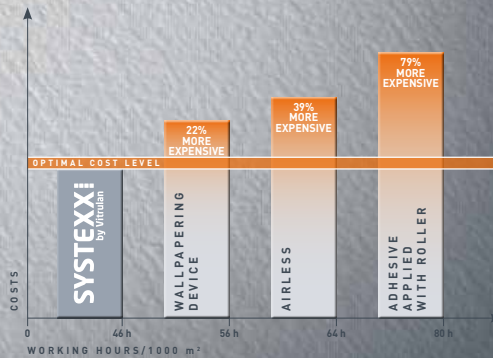

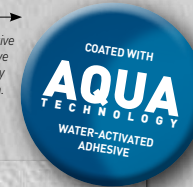

Flame-retardant, generates almost no smoke in the event of a fire, and does not drip.

HARDWEARING SURFACE

Protects walls against damage from knocks, abrasions and scrapes

As it features the effective Aqua Technology, SYSTEXX Active Reno is quick and easy to hang because the adhesive integrated in the back of the fabric is simply activated in the water bath.
